BREAKING THROUGH BARRIERS:

In order to grow, you must overcome challenges. Challenges come in different shapes and sizes for everyone. They can make you or break you. Johnny delivers straight-forward strategies to break through barriers so you can thrive at work and in life. Challenge accepted!

CHAMPION MINDSET:

We live in a day of constant change. If you are not changing and adapting whether it is economic, social, technological, or regulatory you will be left behind. Johnny clearly lays out a plan to develop a champion mindset giving your organization the ability to adapt to change and come out ahead of the competition.

THINK LIKE AN OLYMPIAN:

Nothing happens without taking action. Ultra-performers are men and women who find a way to get the job done with current available resources. Johnny powerfully simplifies elite action steps he acquired in the Olympics and professional football to help everyone in your organization become an ultra-performer and win the marketplace.

LEADING IN THE DIGITAL AGE:

We are connected around the clock and if we are not careful, work never shuts off. We risk burnout and resignations if we don't embrace a healthy work-life balance in a 24/7/365 digital world. Johnny demonstrates the importance of leading through influence (not just positional power), and communicating visually and interactively in the digital age with immediate practical application.
